

ENEON first workshop

*Observing Europe: Networking the Earth Observation
Networks in Europe*
21-22 September, Paris

Thoughts on a funding cycle for ENEON

Dr Paola Campus (paola.campus@unifi.it)

Department of Earth Sciences, University of Florence, Italy

The platform ENEON

- **ENEON** should act as an **interconnecting platform** for the existing Earth Observation (EO) networks, the Science and Technology (S&T) communities involved in Sustainable Development Goals (SDG) and forecasting/prediction.
- **ENEON** should act as well as the **sentinel for new developments** and networks relevant to GEOSS

The platform ENEON

Potential development stages for ENEON

- **Phase 1: Generation of Synergies among different stakeholders**
- **Phase 2: Coordination of actions among different stakeholders**
- **Phase 3: Development of a new reference platform**

Potential development stages for ENEON and related funding: Generation of Synergies

Need funding for promoting networking and
dissemination

European Science Foundation is winding down
all its traditional activities by 2015 → no option

Potential source of funding: **COST Action?**

Most likely area: Earth System Science and
Environmental Management (ESSEM)

ENEON: Generation of Synergies

Cost Action Networking Tools:

1. Meetings: Organized by the Manag. Comm. in any COST Country participating in the Action: NB geographical component of COST!
2. Short-term scientific missions (STSM): exchange visits aimed at strengthening the existing networks. Particularly intended for young scientists.
3. Training Schools: provide dissemination of the Action activities and intensive training in a new emerging subject in one of the laboratories of the Action with unique equipment or know-how. Participants are typically but not exclusively young researchers
4. Dissemination, Publications: publications, electronic media, news releases, events, success story releases and e-mail notification

ENEON: Generation of Synergies

**Is COST a real option meeting the needs of
ENEON?**

In any case: only 5% of proposals is successful

Level of funding, if successful:

on average, 150k Euro per year, for four years

Potential development stages for ENEON: Phase 2 and 3

- **Phase 2: Coordination of actions among different stakeholders:**

Need to monitor the new Horizon 2020 2016-2017 Calls for Coordination Actions

- **Phase 3: Development of a new reference platform:**

Consider entering the next ESFRI Roadmap

The platform ENEON

**I remain at your disposal for further discussion and
elaboration**

Thank You
